

Office Accessories

Power Sources

Features

The SLIDE in-desk module has a unique sliding lid: this allows all outlets to be covered when not in use, and all outlets accessible when the lid is slid open

The SLIDE is also available with wireless charging: simply place your Qi compatible phone on the pad to charge (no leads necessary.)

Slide In-Desk Power Source

Features

Harmony II on-desk module has no visible screws creating a flawless look.

The inclusion of rear access data sockets also allows for greater flexibility achieved by the separate supply of data cable.

Harmony II is configured with segregated power & data/AV choices to suit different workstation requirements and can be fitted to the edge of the desk with C-clamps or adhesive kits, making it functional, yet non-intrusive to the working desk

Harmony II Power Source

Features

Pyramid gives the flexibility of a powerboard in a trendy practical package.

Pyramid can be supplied in two different ways:

As a portable power and mobile charging station, using a standard flexible cable with 3-pin plug

Secured through an 80mm grommet hole

Pyramid Power Source
