

THE MINIBOOK OF IN-LITE

MORE THAN A BRAND

in-lite is more than just an outdoor lighting brand, we are a company with a mission. We do this by developing beautiful outdoor lighting fixtures but, above all, by inspiring as many people as possible and showing that lighting belongs in every outdoor space. And we don't do this alone. An extensive network of partners and outdoor professionals share the same mission. We train these professionals and inspire them with unique ways to use lighting. Together, we make every outdoor space a unique place you can fully enjoy in the evenings.

WHY IN-LITE

in-lite is the fastest-growing outdoor lighting manufacturer in the industry for a reason. Our high-quality products, patented connection system, and innovative technology are designed with professionals in mind. We are committed to helping you grow your business with outdoor lighting.

EASY-LOCK

The EASY-LOCK connector is in-lite's patented connection system. The connector punctures the low-voltage cable and creates an airtight seal by simply twisting the cap onto the body of the connector.

CRI

(COLOR RENDERING INDEX)

CRI evaluates the color rendering and accuracy of objects under manufactured light compared with how they appear under natural light (100 CRI). A higher CRI value means the light reproduces vibrant, beautiful colors more effectively. The quality of in-lite products is unmatched, we only use CRI 90+ LEDs in our fixtures.

LIGHTING DESIGN

At in-lite, we have a specialized team of lighting designers who can help you create the perfect lighting design for your outdoor space. With the right product choices, we ensure a beautifully atmospheric and inviting setting every evening.

ACADEMY

As an outdoor professional, education is essential to take your projects to the next level. That's why we created in-lite Academy: a dedicated platform exclusively for professionals to learn everything about our system, fixtures, and innovations.

THE IN-LITE SYSTEM

HUB ¹

The transformer is the heart of the in-lite system. Choose from HUB-75, HUB-100, SMART HUB-75, SMART HUB-150 or SMART HUB-300. Add up the VA value of your lighting to determine which HUB is suitable.

CABLES ²

The cable can be rolled out from the transformer and guided along the fixtures. There are three types of cables available: 14/2, 12/2 and 10/2.

EASY-LOCK ³

Use the EASY-LOCK to safely connect your in-lite fixtures at any point along the main cable line.

SMART BRIDGE ⁴

SMART BRIDGE allows you to connect the in-lite Smart system to the internet and to other smart home systems such as Google Home, Alexa, and more.

CABLE SPLITTING ⁵

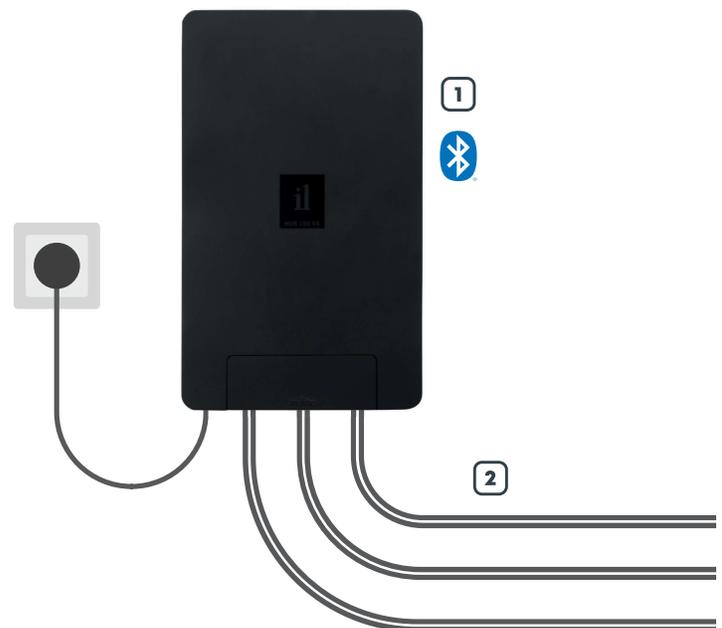

Use the CC-2 cable connector to create a new branch from the main cable line and extend the reach of your system.

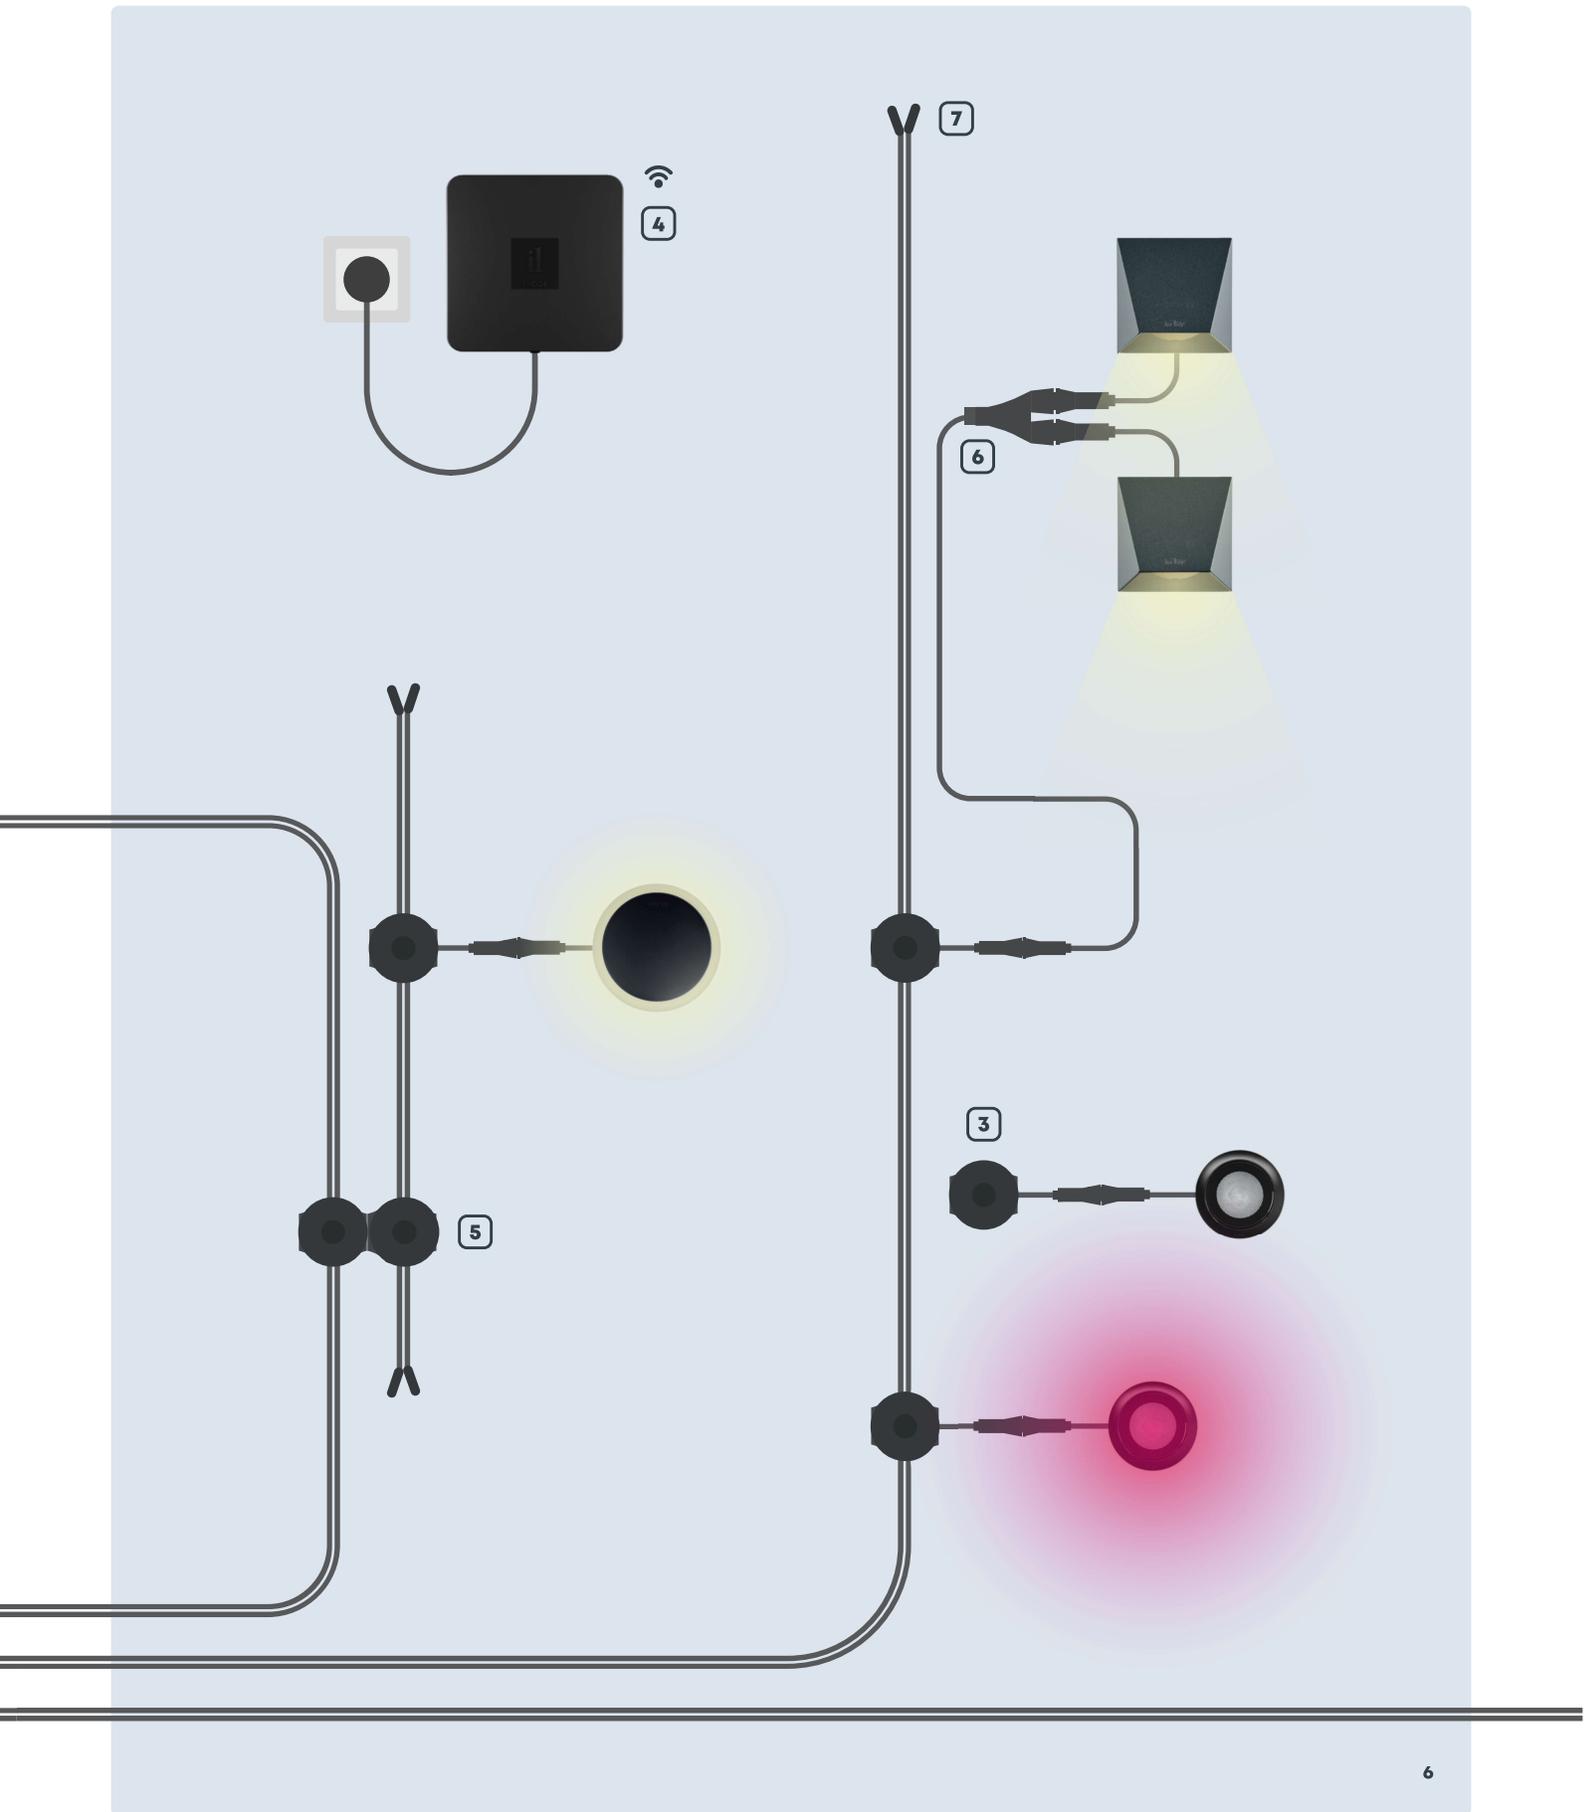

ACCESSORIES ⁶

Is the main cable too short? Use an extension cord. Want to connect up multiple fixtures to an extension cord? Use SPLITTER.

CABLE ENDS ⁷

The cable can end at any point without forming a closed system. Finish off the ends with the included CABLE CAPS to avoid short-outs.

SMART LIGHTING

The foundation of the Smart system consists of a SMART HUB and the in-lite app. You can connect any fixture to this smart transformer and easily set your preferences remotely using a smartphone or tablet. Add accessories like SMART BRIDGE to seamlessly connect to smart home systems like Google Home, Apple HomeKit, Amazon Alexa, Gira KNX, and Matter-compatible brands.

COLOR-CHANGING LIGHTS

Smart Tone fixtures add extra ambiance to your outdoor spaces with vibrant colors. Easily dim and change the color of your Smart lights individually through the in-lite app.

THE RIGHT TONE

SMART SCOPE TONE (1) has a range of up to 5 meters high, ideal for illuminating tall walls and large outdoor objects. SMART EVO FLEX TONE (2) delivers perfectly even line lighting with no visible diodes, while SMART FLUX TONE (3) powerfully highlights special features such as sculptures and façades.

PUCK

PUCK is an above-grade recessed fixture with a semi-covered 360° light source, ideal for accenting driveways, patios, deck risers, and paths without glare. Its versatility invites creativity, use it to add a striking touch to walls or privacy screens.

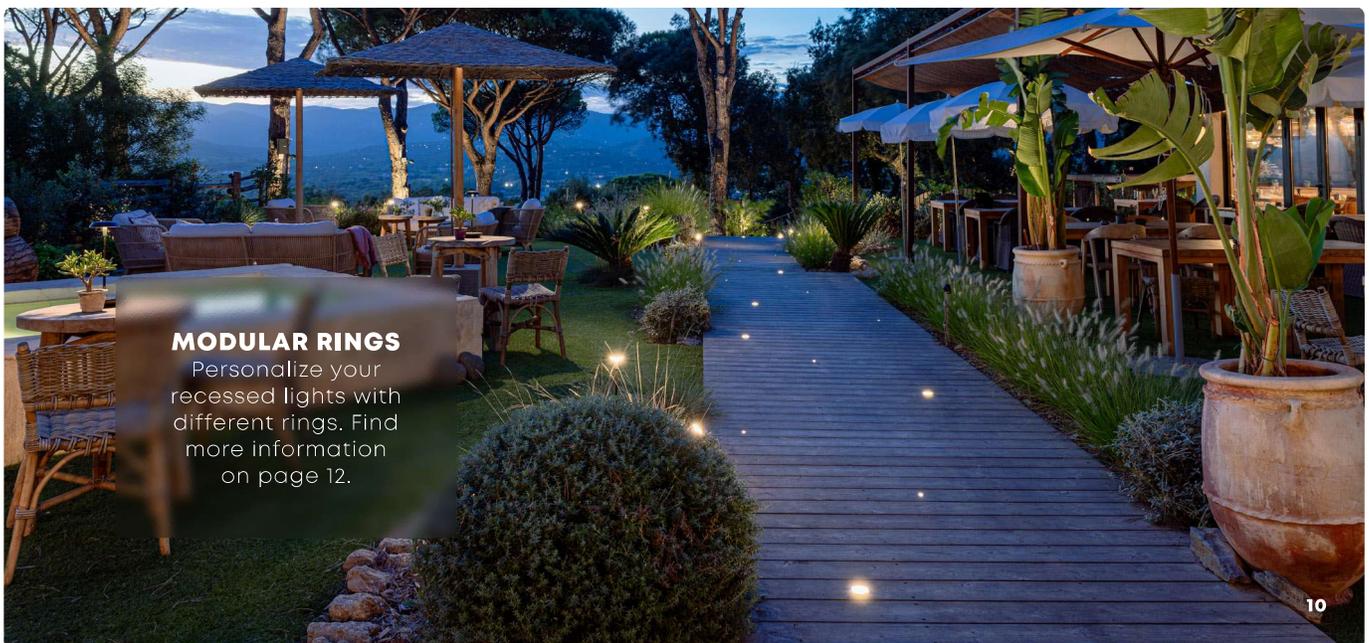

FLUX

FLUX is a powerful and bright recessed light suited for illuminating tall outdoor elements between 5 and 11 meters high. Available with three different ring finishes: Pearl Grey, Black and Stainless Steel.

FUSION

FUSION is the softest light from in-lite's selection of recessed lights. Combine the various sizes to create a unique "starry night" effect. FUSION is fitted with a diffused lens to prevent glare. Available in 60 mm and 22 mm and different ring styles.

MODULAR RINGS

Personalize your recessed lights with different rings. Find more information on page 12.

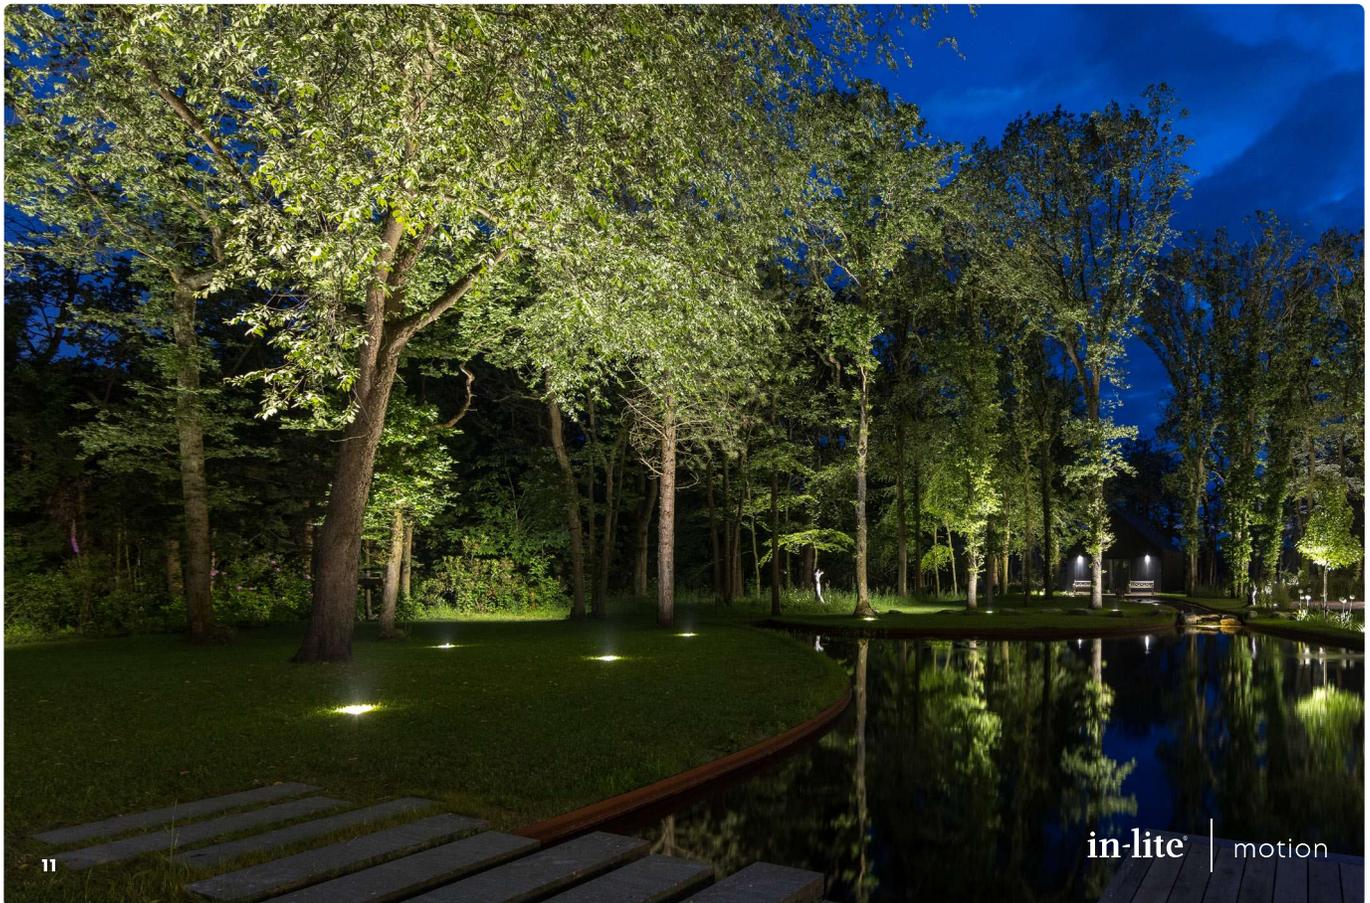

BIG NERO

BIG NERO is designed to uplight tall and wide trees to perfection. Easily adjust the light source using our in-lite Motion technology.

EVO FLOOD

EVO FLOOD is used to uplight big and wide elements such as walls, hedges, and façades. Compatible with both softscape or hardscape applications.

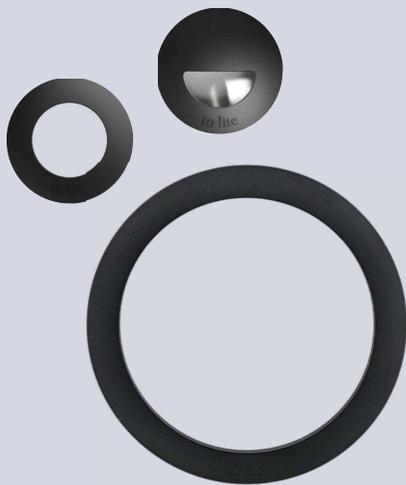

HYVE

HYVE projects a bright and atmospheric beam of light. Equipped with a honeycomb lens, this fixture is ideal for accenting paths, borders, pillars, walls, and driveways. Available 22 mm and 60 mm.

NEW

MODULAR RINGS

Personalize your 22 mm and 60 mm recessed lights with stylish, modular rings. Available in three different colors: Black, Pearl Grey, and Stainless Steel.

NEW

BREEZE

BREEZE creates magic in every outdoor space. The most unique feature of this fixture is its fluctuating light intensity, designed to create a calming presence with its subtle glow. Available in two heights.

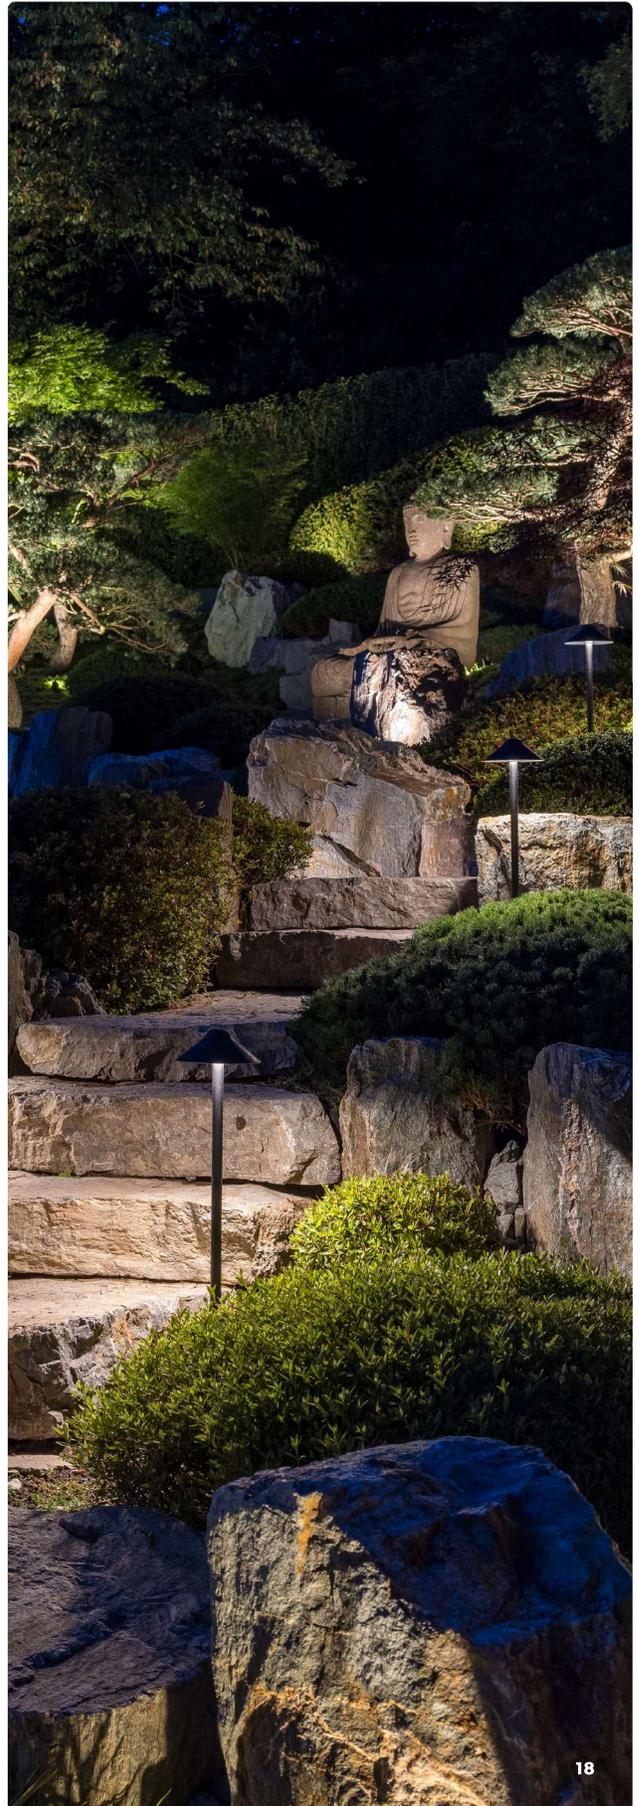

DISC

The DISC series focuses on curves and soft shapes, incorporating unique elements from nature. This series consists of path, ceiling, and wall fixtures.

NAIL

NAIL is an elegant and discreet path light. Ideal for gardens, paths, driveways, and borders. Available in two heights, this fixture casts a soft, subtle beam of light with a 96 CRI.

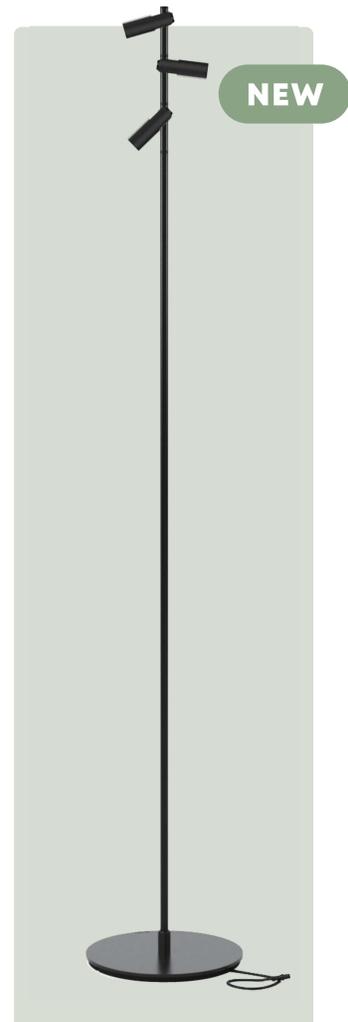

VOQUE

VOQUE is a modern and unique fixture. Designed to create an inviting atmosphere on terraces or lounge areas. Combine VOQUE and BIG VOQUE to achieve an eye-catching & modern design.

AIM FLOOR

AIM FLOOR is the perfect addition to any deck, patio, or lounge area. This floor lamp can stack up to three AIM LIGHTHEADs which you can adjust and redirect to achieve the desired lighting effect.

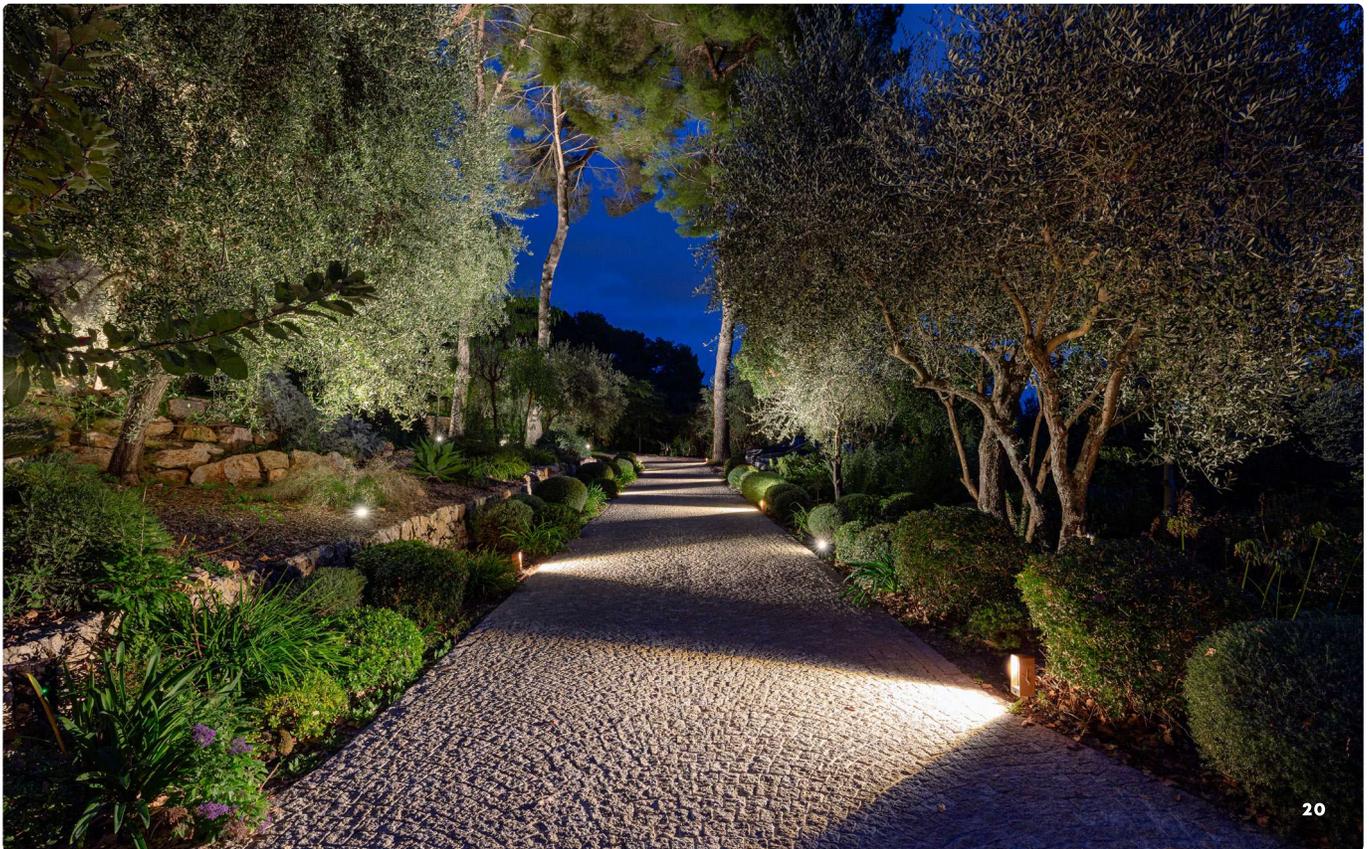

LIV

LIV and LIV LOW are ideal for accenting paths and garden beds. These classic and elegant fixtures cast a 360° glow that's both subtle and atmospheric.

ACE

ACE fixtures come in two heights. Ideal for illuminating paths and driveways with unique lighting effects. Pair them with ACE wall fixtures for stunning results.

SCOPE CEILING

This small but powerful ceiling spot is ideal for illuminating overhangs or pergolas. Use the SCOPE CEILING to shine down on outdoor kitchens, pergolas and lounge areas. Available in two sizes.

AIM CEILING

Mount AIM CEILING to pergolas, ceilings or walls to accent seating, dining, or outdoor kitchen areas. Stack up to three lightheads and adjust each one individually to achieve the desired lighting effect.

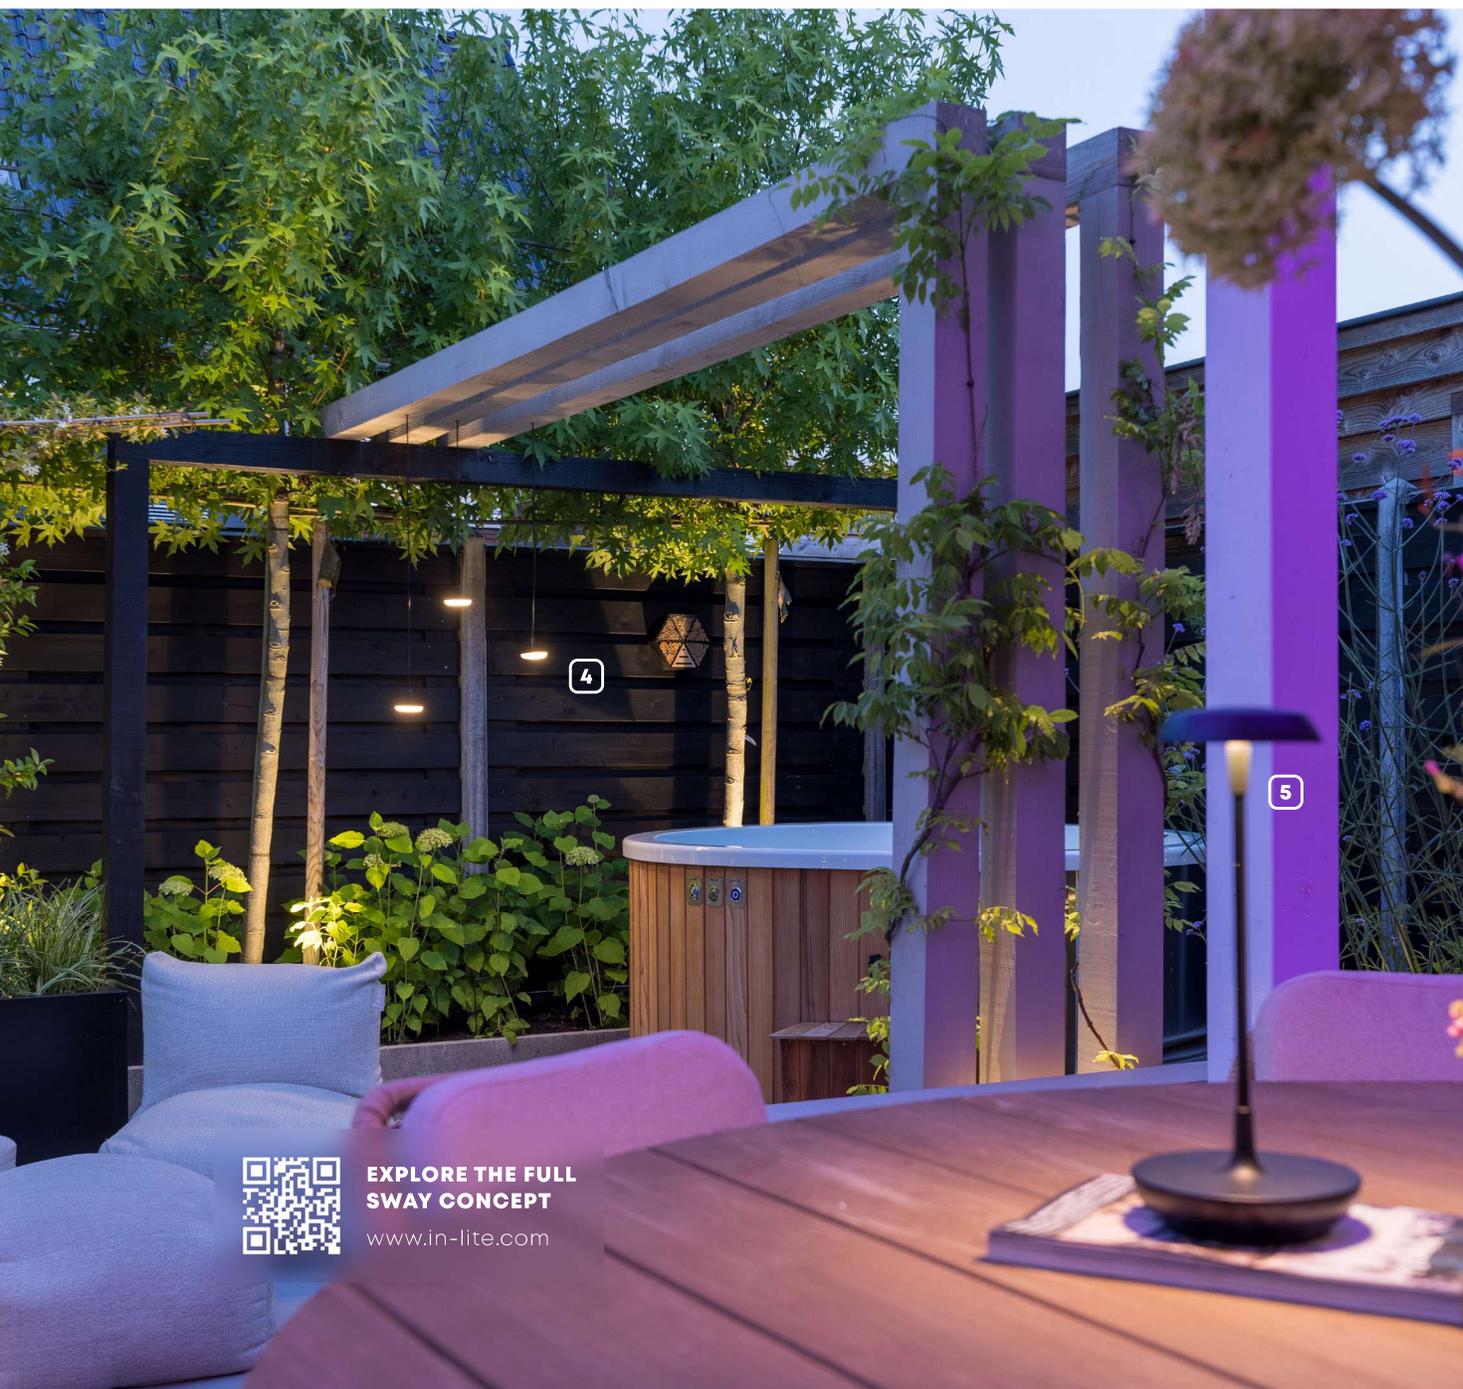

TOUCH DIMMER

Adjust the brightness of your wall, pendant, and ceiling fixtures with a simple touch, featuring 5 smooth dimming levels.

SWAY CONCEPT

At in-lite, we love simplicity. To make choosing easier, we design concepts. A concept is a series of fixtures with a similar design and light output across multiple product categories. By choosing a concept, you automatically create a balanced and atmospheric design for your outdoor space.

CREATING GARDENS IN PHASES

PHASE 1

PHASE 2

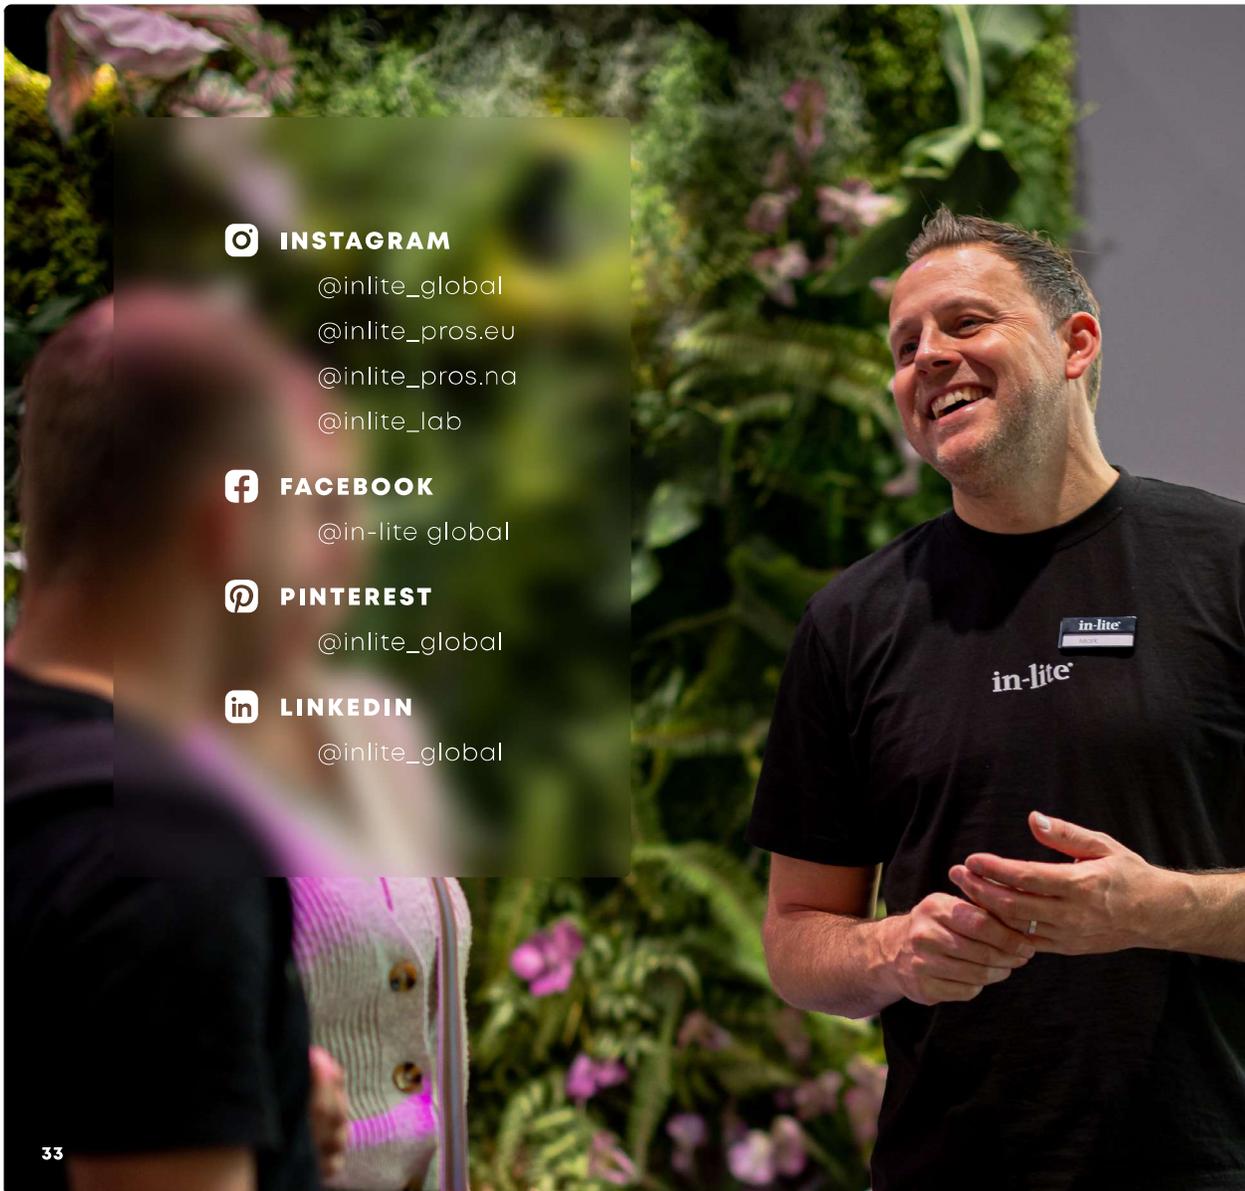

STEP BY STEP

You can phase your in-lite system into stages by running extra cable through the entire space upfront. Start by installing the essential fixtures first, and gradually add more lights over time to complete the full vision and achieve your dream outdoor space.

PHASE 3

EXCEPTIONAL SERVICE

Our experienced team is happy to help you with any questions you may have about in-lite products, installation, warranty and lighting designs. Looking for more inspiration? Visit www.in-lite.com or follow us on social media.

UNIQUE PROJECTS

Looking for lighting design advice for unique outdoor spaces? in-lite LAB is here to show the world why in-lite is the best lighting solution for every outdoor space. From the largest private gardens and hotels to restaurant terraces and semi-public outdoor spaces, our goal is to illuminate with tailored expertise and creativity. We guide you through the entire process, including lighting design, product recommendations, installation, and maintenance.
