WHO WE ARE

Established in 2011, S2Technologies offers technical, program management and professional administrative services in the areas of Operations Engineering and Analysis, Cybersecurity, Information Technology, and Logistics. We deliver mission assurance through quality cost effective solutions to Federal, Civilian, Intelligence and Defense customers. We specialize in providing a wide range of software engineering, IT networking, cyber security, engineering and management analysis, and logistics through research, test, operations, and analysis services.

S2Technologies is a ISO 9001:2015 certified and AWS partner North Carolina based small business. Our staff supports global operations with staff across the country and deployed or located across the globe. We provide staff with advanced science, engineering, and management degrees and certifications ranging from program management to cloud security and architecture. The collective expertise our professionals provide is critical to our customers continued missions' success carrying out global operations while ensuring robust protection and advancement of technical capabilities.

S2 is a current participant and holds certifications from the U.S. Small Business Administration (SBA) for 8(a), HubZone, Service Disabled, Veteran Owned and Woman Owned Small Business Programs. We hold multiple GSA schedules, prime contracts, and other contractual vehicles.

OUR PEOPLE

At S2 our people are our greatest resource. Leveraging their collective genius in support of our customers missions across the globe. From 24x7x365 to whatever the mission requires, our people deliver.

WHO WE SERVE

WHO WE ARE

Our corporate-wide commitment to excellence fosters enduring, value-added partnerships across all of our services. Our company experts leverage cutting edge processes and technologies to expand customer capabilities.

Cybersecurity

- System Security Accreditation
- Assessment and Authorization
- Security Engineering
- Vulnerability Management
- Cyber Operations
- Defensive Cyber Operations

Logistics Programs

- Fielding and Asset Management
- Deployment Management
- Readiness and Mobility
- Training Management
- Training Instruction
- Exercise support

Software Engineering

- Application Development
- Data Engineering
- Cloud Application Development
- SharePoint Development
- Website Design
- Architecture Optimization

IT Operations

- Network Engineering
- 24x7 Help Desk Support
- Cyber Tool Integration
- Cost and Engineering Analysis
- Digital Transformation
- IT Project Management

Ops, Intel & Analysis

- Systems Engineering
- Science and Engineering
- Data Analysis
- Intelligence Analysis
- Test and Evaluation Engineering
- Analysis of Alternatives

PRIME CONTRACTS

Successfully executing contracts with several Defense and Civilian customers, evidenced through our CPARs, renewals, and successive awards.

- SOF Enterprise Acquisition Tools
- BEP Web Application Support Services
- BEP SERENA Application and Data Extract Support
- Warrior Care Program
- C4 Engineering Support
- AFTAC Mission Services II
- AFDW A6 Cybersecurity
- Castle Keep Implementation and Sustainment
- GSA OASIS+ & GSA MAS

PAST PERFORMANCES

PROGRAM	CLIENT	TECHNICAL SCOPE OF PROGRAMS
SEATS	SOCOM	Software Engineering
USASOC APP Dev	SOCOM	Software Development
C4 Engineering Support	SOCOM	Engineering and architecture assessment, testing
Global Field Support Engineers	SOCOM	Field Service Engineers & Training
Warrior Care Program	SOCOM	Database Development
SOMPE	SOCOM	Special Ops Aviation Mission Planning
BEP WASS	Treasury	Software Engineering, development, and Infrastructure support
SERENA Application and Data Extract Support	Treasury	Software Development Specialized Systems Admin and Configuration Management
FCC OISS	FCC	Enterprise IT Operations
616 OC IW Manning	USAF	All Source Analysis and Collection Analysis
EMSO Cell Support	USAF	EMSO Analysis and Mission Support
AFTAC Mission Services II	USAF	Science and Engineering Analysis
Castle Keep	ARMY	Software Engineering, cyber security, fielding and operations
PM IS&A Fielding and Training	ARMY	Logistics, Fielding and Training
PM MC MCSC NOC	ARMY	Full support for PEO C3N systems in production, development and enhancements of new and legacy systems
RNEC NCR ITA TSS	ARMY	Enterprise IT Operations - Desktop, Systems, Database and Network Administration
USMC C4 Cybersecurity	USMC	A&A, RMF, Operational Assessments Penetration Testing
