S2Technologies Achieves CMMI® Maturity Level 3 for Development and Services

Smithfield, NC — S2Technologies, LLC, (S2), a trusted defense and government services partner, proudly announces that it has been appraised at Capability Maturity Model Integration (CMMI®) Maturity Level 3 for both Development (DEV) and Services (SVC). This dual appraisal, conducted by IPower, LLC, a CMMI Institute® Partner, validates S2's commitment to excellence in quality, performance, and continuous improvement across its programs and projects supporting Department of Defense and other federal customers.

CMMI ML3 certification signifies that S2 has implemented well-defined, repeatable, and institutionalized processes that are consistently applied across the organization. This appraisal demonstrates the company's ability to deliver high-quality, mission-aligned solutions through disciplined management practices and a robust framework for process improvement.

"Achieving CMMI ML3 for both Development and Services represents a significant milestone in our journey of operational maturity," said Maggie Stein, CEO of S2. "It reflects the dedication of our entire team to delivering predictable, high-quality outcomes that advance our customers' missions while continuously improving our internal systems of delivery, innovation, and governance."

S2's integrated Quality Management and Process Improvement Program align CMMI with ISO 9001:2015, CMMC 2.0, and Department of Defense cybersecurity and governance standards, ensuring consistent performance across all business functions, including program management, engineering, logistics, IT operations, and cybersecurity.

"This achievement not only validates our process discipline but also strengthens our position as a trusted partner for the U.S. Department of Defense," added Stein. "Our customers can continue to rely on S2 to deliver scalable, secure, and standards-driven solutions that meet the highest levels of quality and compliance."

The appraisal was conducted by IPower, LLC, an accredited CMMI Institute® Partner, and confirms S2's continued growth as a process-driven, mission-focused small business committed to operational excellence in the federal defense sector.
