A brief history

1913

In 1913, Daniel J. O'Conor and Herbert A. Faber file a patent application for a process using paper and resin to make laminated insulators. John G. Tomlin joined the two to form the "Formica Products Company". The partners plan to produce commutator V-rings in which laminate is used as a replacement for the mineral mica, which is where the name **for-mica** was born.

Daniel J. O'Conor

Herbert A. Faber

FORMICA
Made from Anhydrous Bakelite Resins
SHEETS TUBES RODS

1920's

The radio revolution - Formica® Laminate is used for insulating boards and the polished outer box on radio sets.

In 1922, Formica® is registered for the first time as a trademark.

In 1927, the company creates its first decorative laminate, this signifies the beginning of a shift in focus from industrial to decorative products.

1930's

First published use of Formica® Laminates on kitchen surfaces.

In 1936 Formica® Laminate is installed in all bathrooms of Cunard's ocean liner, ***RMS Queen Mary*** when it begins service. Decades later, Formica® Laminates are used extensively for the interiors of the Queen Elizabeth 2 (QE2).

1940's

The Formica® brand enters international markets through a licensing agreement with the respected British firm, De La Rue.

In 1948 the North Shields factory opens in Tyne & Wear.

1950's

Industrial designer Brooks Stevens designs the company's first graphic invention - the still iconic 'Skylark' pattern, which was later renamed 'Boomerang' in 1954.

In 1940, only one quarter of the company's earnings come from the sale of decorative laminate, with the remainder coming from industrial products, by 1950, that ratio is reversed.

FORMICA

In 1953, De La Rue reports that the use of Formica® Laminate has expanded considerably internationally as a recognised material for equipping a modern kitchen.

In 1953, new postforming techniques allow fabricators to bend laminates, applications include curved edge profiles for worktops.

1960's

In 1964, at the World's Fair in New York, Formica Group unveil a show house celebrating the versatility of Formica® Laminate in modern home design, on walls, furniture, and cabinetry. It proves a popular attraction, offering visitors a glimpse into the future of home living.

1970's

The U.S. Federal Trade Commission (FTC) seeks to cancel the Formica® brand trademark, charging that the word "Formica" has become a generic term for decorative laminate products. This creates an uproar in the business community which views this as an attempt to eradicate the function of trademarks in the economy. Ultimately the FTC's action was dropped.

1980's

In 1982, the company introduces ColorCore®, its patented through colour laminate.
A travelling exhibition of pieces in ColorCore features work by architects such as Robert Venturi, Frank Gehry, Stanley Tigerman, James Wines and Massimo Vignelli.

40 years later and utilising this ColorCore technology, Formica Aria® 12 and 20mm through colour compact worktops are available today.

2000's

The company acquires Perstorp Surface Materials, a leading international producer of laminates, worktops, printed papers and foils. Leveraging the combined manufacturing and design expertise of both companies, Axiom® worktop products are updated and grow throughout the next decade.

2010's

In 2018, Formica Group of companies acquired by Broadview Industries. Broadview Materials is a global group of leading surface material brands, including Formica, FENIX, Arpa, Homapal, Getacore, Trespa and Westag.

Unapologetically original. Worktops made for today

For generations, Formica® brand laminates have been synonymous with long lasting, easy to clean, kitchen surfaces - trusted by families, chosen for homes, and loved throughout the decades. As the inventors of high pressure laminate, we continue our legacy of producing high quality, stylish, and reliable kitchen surfaces with the launch of the Formica® Originals Worktop Collection.

Your kitchen is more than just a space to cook - it's where meals are shared, memories are made and everyday moments turn into something special. It should be as stylish as it is functional, harmoniously blending beauty, durability and innovation to complement the way you live.

That's why the Formica Originals Worktop Collection is thoughtfully designed to bring both style and everyday resilience into the heart of your home.

Showcasing the latest in kitchen trends, the collection strikes the ideal balance between aesthetics, functionality and long-lasting quality.

Whether you're drawn to the refined elegance of a hospitality-inspired kitchen or the warm charm of a luxury farmhouse aesthetic, our worktops offer an effortless way to bring your dream kitchen to life. The collection features 52 carefully curated worktop options, including 24 premium square-edged and 28 classic postformed, complemented by matching and feature splashbacks, plus upstands for a coordinated, design-led look.

Often imitated, never equalled - the Formica® Originals Worktop Collection is genuine, enduring and a true original.

Stones

Elevate your kitchen with the natural beauty of stone

27 stone inspired designs - 12 square edge and 15 classic Axis postformed options

More than just a surface, stone-inspired worktops bring a sense of timeless beauty and refinement to your kitchen. Whether you prefer crisp, minimalist whites or bold-veined marbles with rich texture, our stone inspired designs exude sophistication, transforming everyday spaces into extraordinary ones.

A striking marble island or breakfast bar can naturally anchor a kitchen, distinctively defining cooking and social areas in open plan layouts. The result? A perfect blend of functionality and aesthetic appeal, crafted for modern living.

Our extensive selection of natural and engineered stone designs feature the varied and unique characteristics of marble, travertine, granite, concrete and slate. No matter what your style, space, or lifestyle, you'll find a stone inspired worktop to complement your vision.

Woods

Wood-inspired warmth, designed for modern living

16 wood inspired designs - 8 square edge and 8 classic Axis postformed options

Wood-inspired worktops bring natural warmth and organic charm into the heart of your home. From golden, sun kissed tones to deep, moody hues, these surfaces add depth, texture, and timeless appeal to any kitchen.

Our carefully curated worktop range captures the finest qualities of oak, walnut, and other premium wood species, balancing natural beauty with the resilience of modern surface technology. Intricate grain patterns and rich tones create the perfect foundation for your dream kitchen, complementing styles from rustic farmhouse to modern minimalism.

Beyond their visual appeal, our wood-inspired worktops are crafted for everyday use, the sealed laminate surface offers resistance to moisture and surface wear, making it a hygienic, easy to maintain and long-lasting choice. All the natural beauty of wood without the upkeep, ensuring your kitchen surface remains as stunning as it is practical, for years to come.

Raven Oak

Sovereign White

Sovereign

Sovereign warmth for metallic luxury

2 designs with gold metallic inclusions

Sovereign worktops present a rich, warm interpretation of metallic elegance, featuring subtle gold and bronze inclusions that add opulent warmth and depth.

Mid-scale gold flakes and a delicate micro-metallic dusting result in a multidimensional surface that exudes contemporary radiance. Perfect for interiors embracing the metallic luxe trend, these versatile designs enhance kitchens that are looking for a touch of glamour.

Platinum

Worktops for refined elegance

4 designs with silver metallic inclusions

Bring refined elegance and contemporary sophistication to your kitchen with Platinum worktops. Infused with delicate silver metallic particles, Platinum surfaces offer a captivating interplay of depth, texture, and light - elevating your kitchen with understated luxury.

This beautiful decor range features shimmering silver flecks and harmonious undertones, striking a perfect balance between modern minimalism and timeless appeal. A range of monochrome colours with metallic highlights, complement a wide range of interiors, from sleek contemporary spaces to bold, statement kitchens.

Designed for modern living, Platinum worktops are as practical as they are beautiful.

Crisp White *(38mm Axis)*

Crisp White

Timeless simplicity, effortlessly versatile

Crisp White in square edge and classic Axis postformed options

For those who appreciate the beauty of minimalism, our Crisp White worktops offer a sleek and sophisticated foundation for your kitchen or utility space. Whether enhancing a modern, ultra-clean aesthetic or balancing bold cabinetry with a fresh, neutral contrast, this timeless surface brings effortless versatility to any space.

Paired with Essence, a subtle matt texture, Crisp White creates a light, airy feel, making kitchens appear more open and inviting. Its clean, unembellished design complements everything from contemporary handleless units to classic shaker-style cabinetry, ensuring a perfect fit for a variety of interior styles.

Beyond its crisp visual appeal, this worktop is crafted for everyday living. Offering a durable and easy to maintain surface, it is a practical yet stylish choice for modern homes.

Edge profiles & thickness

Decors have been partnered with the most appropriate edge profile and thickness for the most authentic finish.

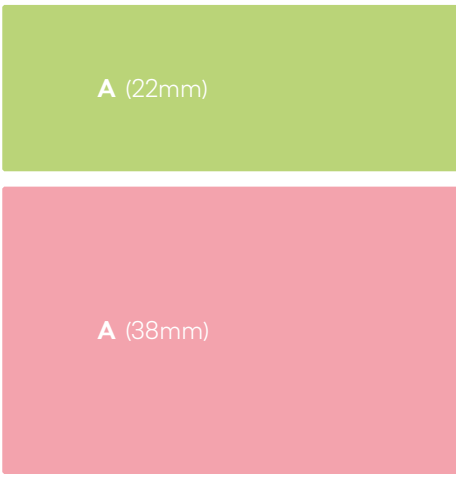
22mm thickness - modern trend for slimline worktops. Slab like appearance of ceramics, engineered and natural stones.

38mm thickness - reflects the classic luxury and visual presence of thick wood, granite and marble work surfaces.

A. **Square Edge**

22mm and 38mm thickness

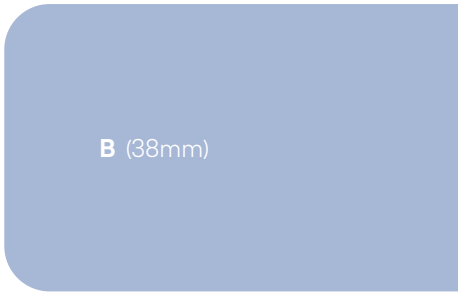
Specialist edging applied to create a modern, angular square edge.
An authentic look for both stones and woods.



B. **Axis Postformed**

38mm thickness

A continuous curve that wraps around the front edge of the worktop.
Axis profile offers a tight curved edge for a sleek and contemporary appearance.



C. **Linea Postformed**

38mm thickness

A continuous curve that wraps around the front edge of the worktop.
Linea profile offers a more generous curve to complement the metallic luxe of the Platinum range.

Matching upstands and splashbacks
All worktop designs in the Formica® Originals Worktop Collection are also available in matching upstands and splashbacks, allowing you to elevate your kitchen's style and practicality. These coordinated additions offer a harmonious look by continuing your worktop design onto the walls, protecting them from everyday splashes and spills while creating a refined, cohesive finish.

10 year guarantee of quality
Formica Group warrants to the buyer of a Formica worktop, splashback or upstand that for a period of ten (10) years after installation, it will be reasonably free of defects in materials and workmanship and conform to published data sheets and specifications.

In the event that a product fails to conform to this limited warranty, Formica shall, at its sole option and discretion, either repair or replace such product.

Exclusions:
This limited warranty does not cover any damages attributed to causes unrelated to Formica's manufacturing process, including but not limited to incorrect, faulty or improper handling and/or installation, damages caused by unreasonable use, misuse, physical abuse, accidental damage, normal wear and tear, exposure to corrosive elements in the atmosphere, mildew, or the use of harmful cleaning compounds.

Please refer to *Formica® Laminate Worktop Installation and Maintenance* guide on formica.info for a full list of guidelines, warranties and exclusions.

Please Note:
- The guarantee becomes void once the curved post-formed edge has been cut off.
- Due to the inherent properties of platinum etchings, metallic and gloss splashbacks and upstands, extreme care should be taken on installation to avoid scratching. Formica Group cannot accept any responsibility for the surface performance of these products if the owner/user fails to follow the installation and care guidelines.
- Please consult the installation guide prior to installation.

The *Formica® Laminate Worktop Installation and Maintenance* guide has been developed for guidance only. Formica Group cannot accept responsibility for the final fitting of your worktop. Colour and surface finish should be checked before installation. Formica Group will not accept any claims for re-fitting costs resulting from mis-matched surface colour or finish. To ensure that your laminate worktop remains in excellent condition, it is essential that all exposed edges of the chipboard are sealed with a silicone sealant or contact adhesive. For a sink cut-out, the exposed raw chipboard should be treated with a water seal or varnish. In addition to this, we would also recommend the use of a purpose made gasket, often supplied with the sink or silicone sealant applied to the perimeter of the sink prior to installation. The hob cut-outs can be protected in the same way but it is also advisable to cover the exposed edges and the edge of the laminate with aluminium foil, to prevent the heat affecting the cut-out.

Disclaimer

General

The information provided by Formica Group ("Formica") in this document is solely indicative. The information given in this brochure is correct at the time of publication. However, as we have a policy of constant product development and improvement, product specifications may change in the future.

Visit formica.com, or formica.info for technical data, as the most up-to-date source of information. Formica does not warrant that the information in this document is suitable for your specific purpose.

Product scans and images in this document are provided for guidance only. Please note that different surface finishes (texture structure and gloss levels) can have an effect on colour perception. When exact colour information is required, or for cross-material matching (HPL to other materials), please always refer to an actual laminate sample in the specified surface finish.

Not all certifications stated are applicable or available for all Formica® products. Please check that the product you require is covered by a relevant certification or is suitable for your specific application, in advance of order placement.

Liability

Formica is not liable (neither contractual nor non-contractual) for any damage arising from or related to the use of this document, except if and to the extent that such damage is the result of willful misconduct or gross negligence on the part of Formica and/or its management. The limitation of liability applies to all parties affiliated with Formica, including but not limited to its officers, directors, employees, affiliated enterprises, suppliers, distributors, agents and representatives.

General Conditions

All sales of Formica® brand products are governed by the Formica General Terms and Conditions of Sale in effect at the time of sale and contained in every order acknowledgement and are available on formica.info

Intellectual Property

All intellectual property rights and other rights regarding the content of this document (including logos, marks, text and photographs) are owned by Formica Group and/or its licensors.
