Press Release – Cityus establishes French entity and expands Paris portfolio

European serviced apartment operator [Cityus](#) has established a dedicated French corporate entity and expanded its central serviced apartment portfolio in Paris to meet growing [corporate demand](#) across European business hubs.

Alongside this legal structuring, Cityus has added newly furnished studio and one-bedroom apartments across [prime business districts](#), specifically the 7th, 8th and 17th Arrondissements, with a continuous pipeline of additional central properties planned for delivery throughout the coming year.

Operating on a minimum stay policy of one month - the strategy directly addresses the severe constraints in Paris for vetted, compliant extended-stay corporate housing - positioning Cityus as a core partner for Destination Service Providers (DSPs), Relocation Management Companies (RMCs), and global mobility managers.

Cityus's [Paris portfolio](#) caters directly to business travellers, international project teams, and relocating professionals with bookings driven through B2B corporate mobility channels and relocation agencies.

Strategic footprint across key Paris business districts:

Cityus's newly onboarded inventory focuses on business corridors that connect directly to Paris's Central Business District (CBD) and the La Défense financial district:

Cityus' growing portfolio spans the [7th, 8th and 17th arrondissements](#), giving RMCs, DSPs and corporate clients greater choice when matching accommodation to an assignee's workplace, commute and individual requirements.

From the **7th arrondissement**, well positioned for diplomatic, government and international assignments, to the **8th**, at the heart of Paris's established corporate and financial district, and the **17th**, offering convenient access to both central Paris and the La Défense business hub, the portfolio is designed around the locations that matter for corporate stays.

All apartments are fully furnished with dedicated workspaces, high-speed Wi-Fi, fully equipped kitchens, and in-unit laundry facilities tailored for extended stays.

Integrated end-to-end operating model

Beyond physical real estate, Cityus operates on a structured, high-touch support model designed to solve common pain points experienced by corporate partners, such as fragmented communication and slow on-site issue resolution.

A dedicated booking team

Working directly with corporate clients, DSPs and RMCs to match **brief requirements – including stay duration, proximity to corporate offices, budget parameters and compliance criteria – with suitable premium inventory**, while offering the flexibility to adapt to changing dates, extensions and evolving guest requirements.

Multilingual customer care and digital guest support: a multilingual in-house team, provides **7-day-a-week assistance throughout the stay**, while a dedicated guest app gives residents direct access to key stay information and support, helping to **ensure service quality and immediate issue resolution**.

Establishing a dedicated corporate entity in France forms part of Cityus's wider strategic roadmap to deepen its presence in key European business destinations, providing an institutional, service-led alternative to traditional short-term rental supply for the corporate relocation market.

"Establishing a French entity is an essential structural milestone for Cityus as we strengthen our presence and expand our portfolio across key French cities, including Paris, Grenoble, Bordeaux, Toulouse and Nantes. Corporate mobility stakeholders face acute inventory shortages for high-grade, fully compliant residential stays in central Paris. By pairing a robust local presence with our booking, property management and customer care teams, we offer relocation partners the institutional reliability and personalised service they require when relocating their employees." - **Bella Nokes, Founder & CEO, Cityus**
