ABOUT REAL FLAME

Since being founded in 1983, we have been at the cutting edge of fireplace design in Australia. With a heavy focus on continuous improvement and breakthrough innovations to keep us in the forefront of the Australian fireplace industry.

In 2016, we joined the Glen Dimplex Group, a global group with expertise in research, design & manufacturing. This support has given us the ability to expand our product range with wood burning options as well as state-of-the-art electric fireplaces.

We design almost all of our fireplaces in Australia for Australian's, this includes development and manufacturing at our headquarters in Melbourne's outer east. Extensive research and testing has allowed us to create fireplace solutions to suit all – whether you're renovating, building or just replacing a fireplace. We invite you to explore our wide range of fires and gain inspiration for your next project.

HOW TO CHOOSE YOUR GAS FIRE

There are many options to choose from when thinking about a gas fire - it's all about look, feel, and function. Start the process by considering the below options to find the right fire and fireplace for you.

1. SELECT FIRE TYPE

HIGH EFFICIENCY - Fires designed for efficient warmth as well as beauty.

DECORATIVE - Stand out from the crowd in all seasons with our purely aesthetic fires.

2. SELECT MEDIA

Options may include **PEBBLES, DRIFTWOOD, RED GUM, FOREST FLOOR** or **LOGS & COALS**.

3. SELECT TRIM

3 SIDED - For floor leveled placement.

4 SIDED - For raised placement.

Model specific aesthetic options are available.

4. SELECT FINISH

BASES AND PEDESTALS - For decorative fires so you can tailor the style to your décor.

FRONTS - Frame your fire with our classic option.

5. FLUING OPTIONS

Most of our fires come with a set flue option. There are 3 types, each one best suited to a particular application.

CONVENTIONAL - For standard open fronted fires where the flue will terminate vertically.

BALANCED - For glass fronted room sealed fires that use outside air for combustion.

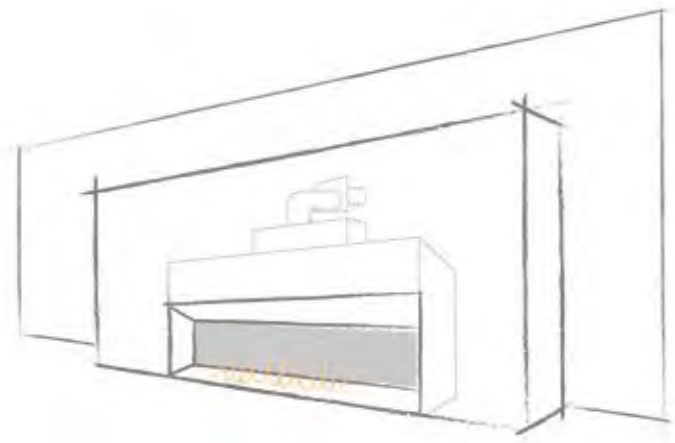

POWER - For ground floors, apartment blocks and where the intended fireplace does not back onto an outside wall.

NOTE: Not all options are available on all fires or sizes. Speak to our showroom consultants or visit www.realflame.com.au for clarification. See instruction manual on our website for more technical information.

HIGH EFFICIENCY GAS FIRES

High efficiency gas fires are designed to pair beautiful flames with maximum heating capacity. If you are looking for a fire to keep the chill away on cold winter evenings, these fires are perfect for you.

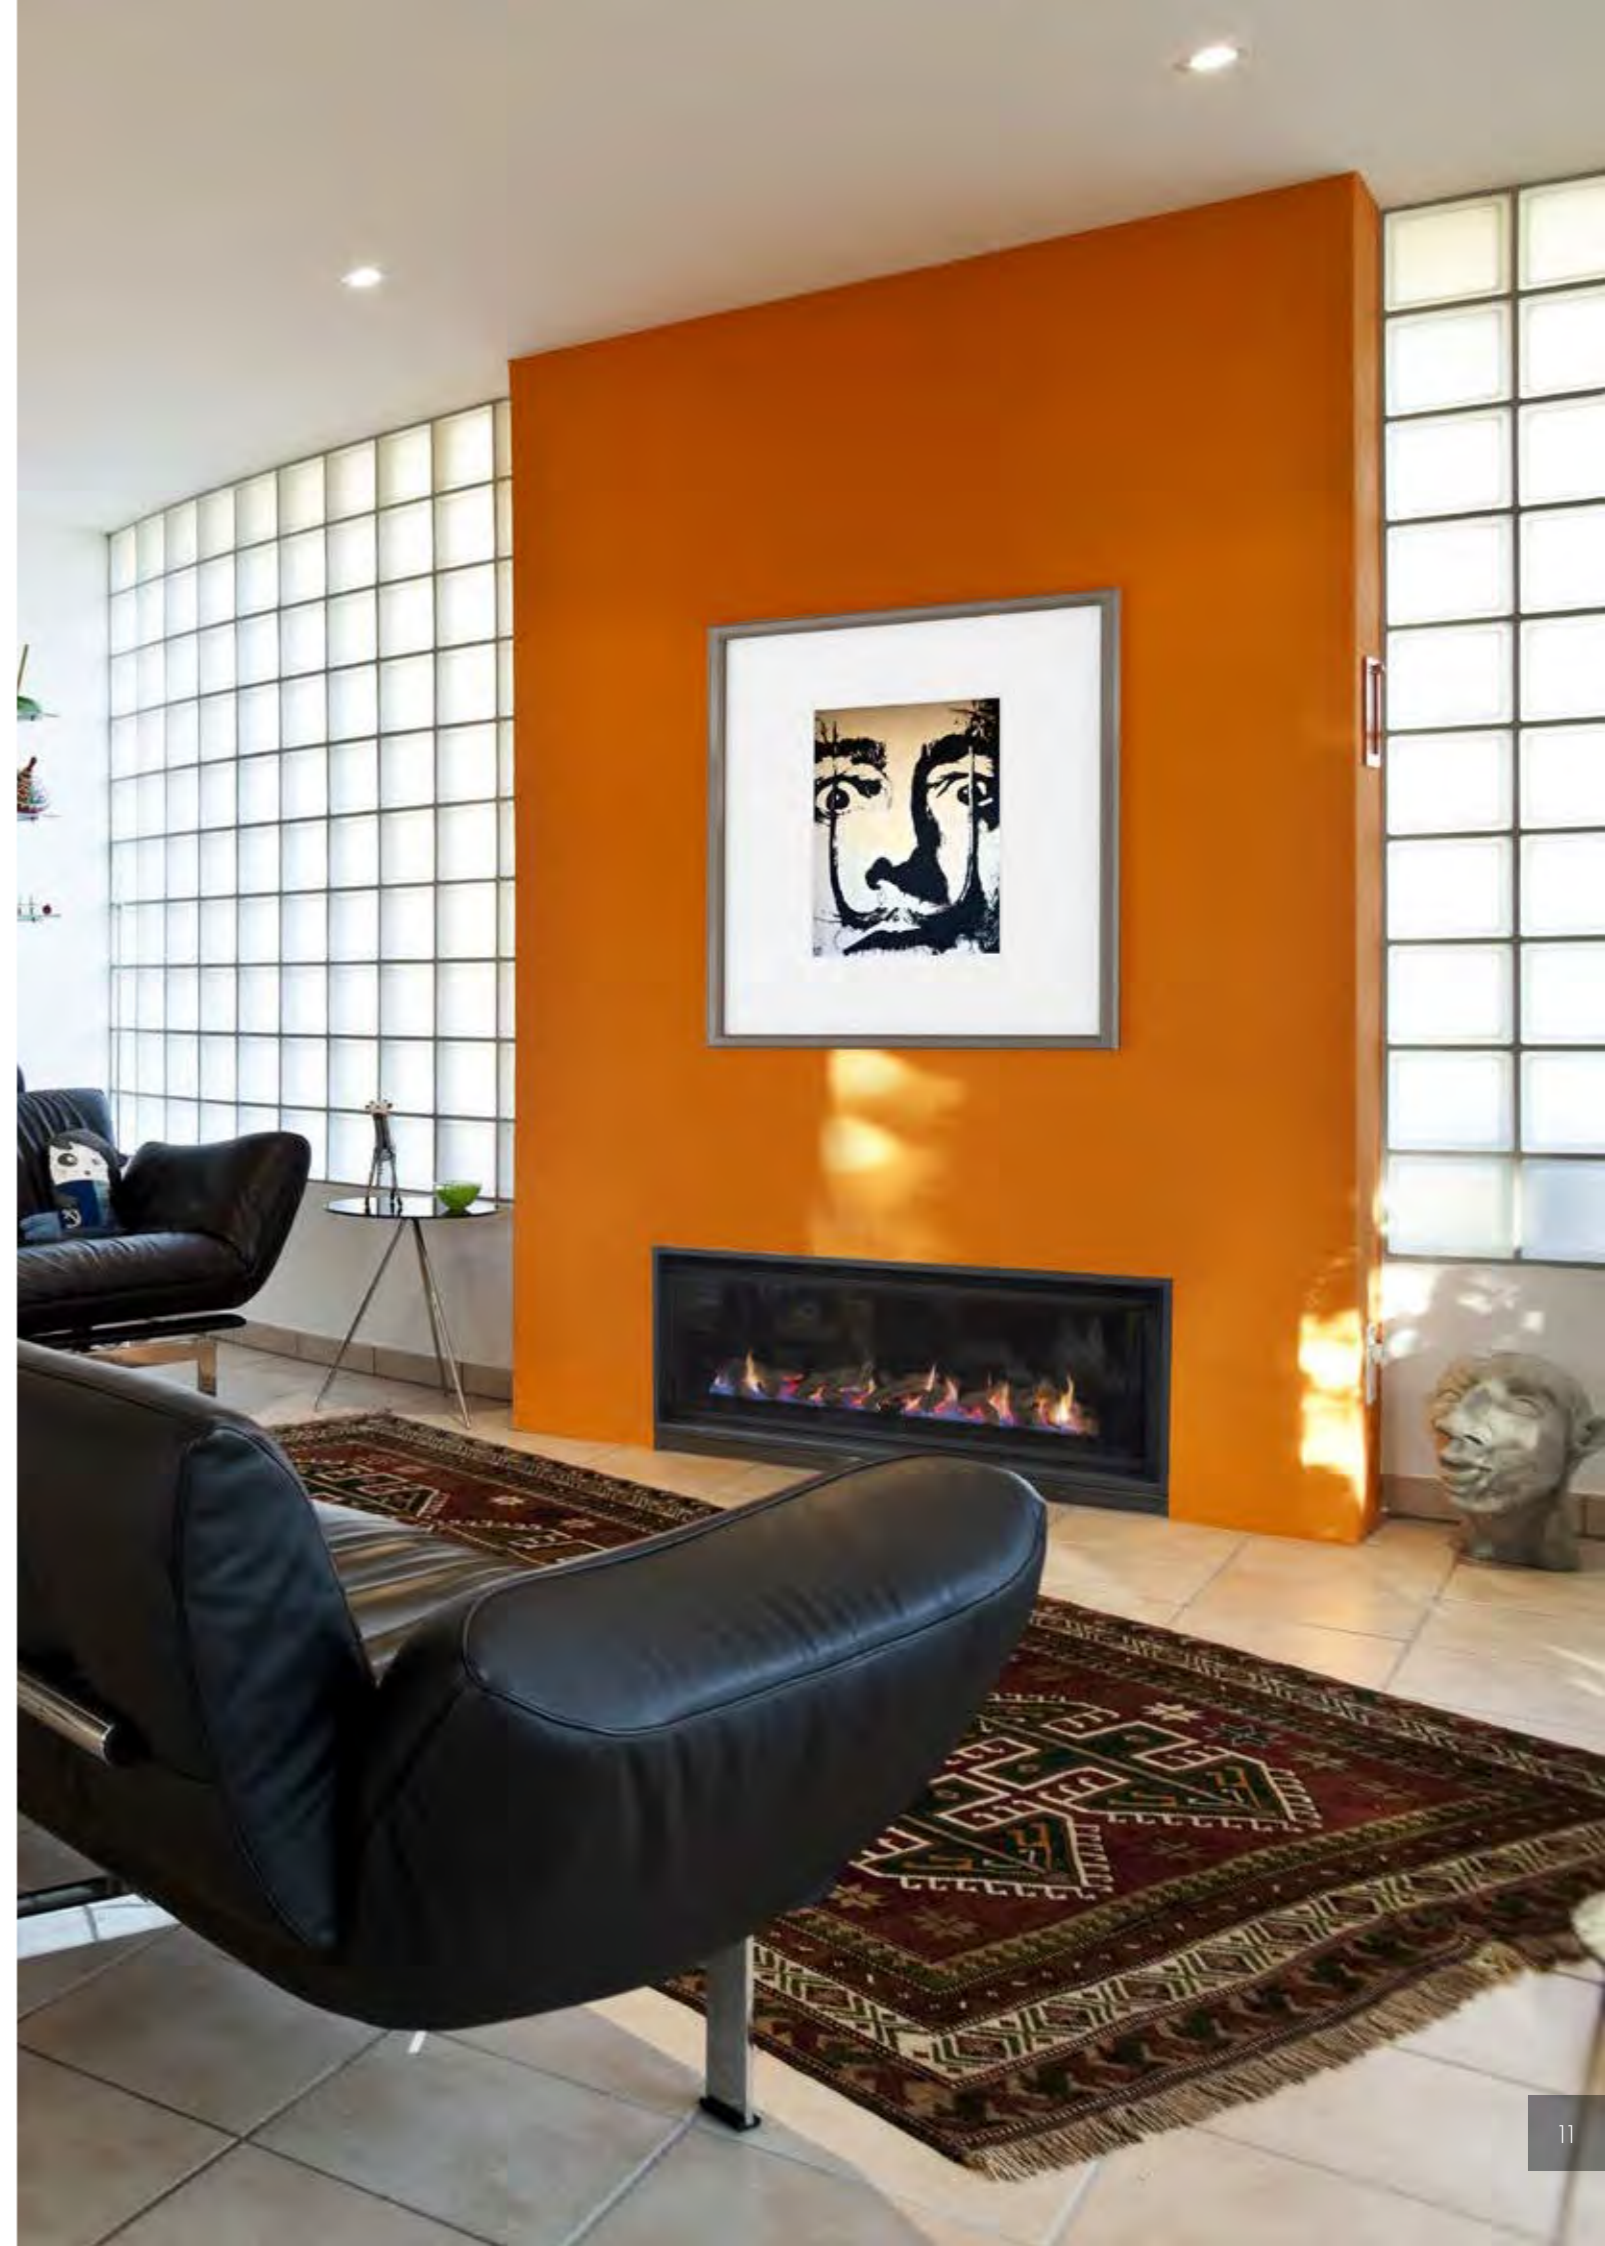

ELEMENT

A BREATHTAKING ADDITION TO ANY SPACE

The Element range is simply breathtaking with its clean lines, beautiful flame pattern and multiple media options. With an impressive star rating and the latest in power balanced flue technology it makes it the perfect package for the discerning buyer. A full remote is standard giving the owner complete control of the fire. The Element also has WiFi capability with an app enabling operation of your fire from your smart device so your room is nice and cosy for when you get home!

- Power balanced flue
- New Application
- Natural gas, LPG or ULPG
- Full remote control function
- Double glazed space heater
- WiFi compatible

CAPTIVA

ELEGANT AND EFFICIENT

The Captiva™ gas fire is a glass fronted, star rated space heater, designed to heat large areas whilst keeping the gas bills under control. It is available with either a black or stainless steel finish and looks great in modern or classic environments. With 2 media options available; logs and coals or pebbles, this fire commands attention. The Captiva™ can be flued horizontally or vertically up to 8.5m using a direct vent balanced flue system, which takes the combustion air from outside. Beauty and efficiency in one fire.

SIGNATURE

TRULY CUTTING EDGE DESIGN

The Signature range is truly cutting edge design. With the ability to add glass to one, two, three or four sides of the Double Vision, Elegance, Simplicity or Pure Vision models, it allows the designer total flexibility. Once the decision has been made on which sides will have glass, the designer then has the option to extend the glass up to 1600mm, creating an incredible design centrepiece for the modern home or commercial space.

HOW TO CHOOSE YOUR WOOD FIRE

When choosing a wood fire, the main thing to consider is whether you want it freestanding or built in. Once you have decided this, consider the size of the space you need to heat and how the fire will be flued.

1. SELECT BASE TYPE

FREESTANDING - Feel heat from more angles.

INSERT - Fill in an existing fireplace or save space and build your own mantel.

FLUING

The **CONVENTIONAL** flue is a standard for all our wood fires.

NOTE: The m² heating capacity will vary depending on location, insulation values, and other thermal influences, including the type of wood used. Speak with your sales consultant if unsure.

Not all options are available on all fires or sizes. Speak to our showroom consultants or visit www.realflame.com.au for clarification. See instruction manual on our website for more technical information.

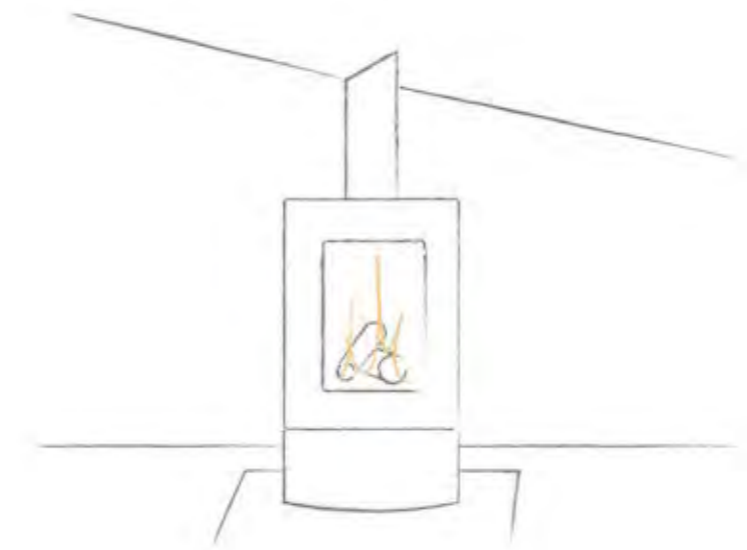

WOOD FIRES

Wood burning fireplaces have been the centrepiece of many homes for generations. Our range is a modern take on what a wood burning fireplace can be in a more contemporary world.

LIGNA

The Ligna™ series of open fronted wood fire inserts are a stunning addition to any environment. Apart from being economical to install, they produce brilliant radiant and convection heat much more efficiently than a conventional masonry fireplace. The unique heat exchange design traps hot air which would otherwise be lost up the chimney. The air is then circulated through natural convection into the room so the heat is kept inside the room where you want it.

New or existing applications

Hide away safety screen

HOW TO CHOOSE YOUR ELECTRIC FIRE

Like gas and wood fires, there are some things you need to consider when choosing an electric fire. Our short guide below is there to help you make the best decision for your needs.

1. SELECT FIRE TYPE

DECORATIVE - Stand out from the crowd in all seasons.
HEATING - Find a model that matches your room size to encase your room with warmth and beauty.

2. SELECT MEDIA

Options may include PEBBLES, DRIFTWOOD, GLASS and LED LOGS.

NOTE: Not all options are available on all fires or sizes. Speak to our showroom consultants or visit www.realflame.com.au for clarification. See instruction manual on our website for more technical information.

ELECTRIC FIRES

Electric fires make flame accessible to everyone, all year round. Whether you live in an apartment or are looking to provide your guests with the ultimate in hotel luxury, we have a solution for you. Our Optiflame linear fires can add the beauty of flame anywhere with a power supply, while our patented Optimyst effect allows you to experience the magic of cool touch flame created from water.

OPTIMYST

Our Optimyst CAS500 and CAS1000 are the perfect solution for applications where gas or wood are not viable. Available in two sizes, the cassette design allows the home owner, designer or architect to design an impressive centrepiece that is deceptively real and will captivate you from the moment you see it. The fully 3 dimensional effect uses established ultrasonic technology adapted from commercial applications to create an ultra fine water mist that is illuminated to create the flame and smoke effect. Whether in the home, apartment or commercial environment the Optimyst will create the perfect centrepiece for your project.

- Easy to install
- No flue required
- Easy fill water tanks
