

Wall Planning GROUP

Renee Wall
Director

Renee Wall has brought her international project experience to the Central Queensland region. She has a deep understanding of complex projects in remote, rural, regional and metropolitan regions, successfully bridging between industry and community.

RELEVANT EXPERIENCE

Moreton Bay Indoor Sports Centre – The MBISC is slated to be one of the sporting venues for the 2032 Olympics and Paralympics in Brisbane. Renee and the WPG team carried out a Social Impact Evaluation for the proposed facility with the baseline study extending out to surrounding community to assess its continued use post-Olympics. This project has had a highly successful outcome, with the Sports Venue Review recommending the development go ahead and allocating a GREEN rating – the only Olympic venue to date to have received this.

Nebo Showgrounds Master Plan – The Wall Planning & Environmental Consulting team, in partnership with Isaac Regional Council (IRC), are developing a master plan that will support dynamic economic and social opportunities.

Fernvale Recreation Grounds Master Plan – On behalf of Somerset Regional Council, Renee and team facilitated community consultation with the Fernvale Recreation Grounds to develop a master plan for the multipurpose grounds that plans for the long-term future of the precinct.

Central Queensland Wind Farm Community Consultation & Stakeholder Engagement – On behalf of Epuron, Renee and team facilitated the community consultation activities for a number of Central Queensland Wind Farm Projects

Clermont Mine Closure Preparedness Project - On behalf of Glencore, Renee and team are delivering comprehensive engagement for the development of a Social Impact Assessment with the goal of designing a pathway to closure that seeks to mitigate the impacts of mine closure and provide positive community outcomes.

Carmichael Rail Network Project - On behalf of Martinus Rail, Renee and her team established and delivered the first phase of the Martinus CRN Environmental Team and project management systems. Renee developed the CEMP, Environmental sub-plans and, Environmental Work Method Statements as well as maintaining compliance with environmental obligations, requirements, and methods for the Rail Project.

St Elmo Vanadium Project – Renee facilitated the Social Impact Assessment, including community consultation and stakeholder engagement, as part of the first EIS for a Vanadium Project in Australia.

Seniors Living Project – On behalf of the Belyando Enterprise Network Inc, Renee completed a series of site investigations, commissioned a demographic study, conducted a community survey, and facilitated a series of focus groups to identify community retirement living preferences.

Clermont Solar Farm – Renee facilitated the community engagement for Epuron's Clermont Solar Farm project, a 150MW solar farm. The engagement strategy included a community drop-in session that was well attended and included a visit from State and Federal MPs.

Rugby Run Solar Farm – Renee established a stakeholder engagement strategy for the Adani Rugby Run Solar Farm, based outside of Moranbah. The successful strategy ensured that the project was achieved at minimal cost and timeframe delay.

QCLNG Project – On behalf of QGC, Renee undertook a Compliance Review of the Permits and Approvals for the Operations Phase of the QCLNG facility on Curtis Island, Gladstone, Queensland.
