

BL SERIES AC

Recreational, Worksite & Emergency Applications

EXINLIGHT
By DEEPS ENGINEERING

BL8000AC - BL16000AC

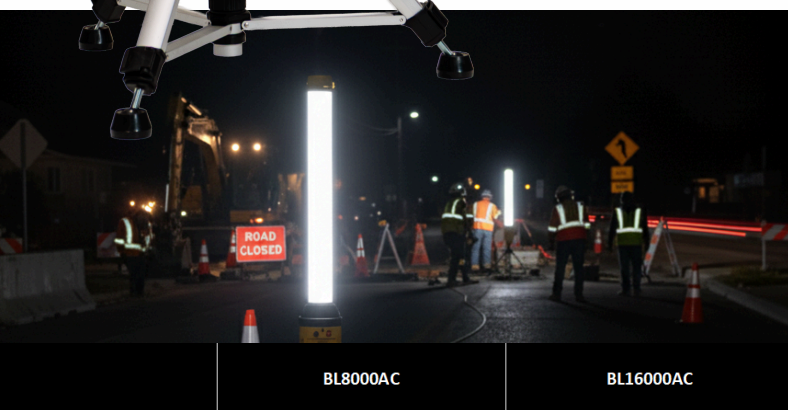

The BL Series BL8000AC & BL16000AC are high lumen area tripod lights. Producing 8,000 and 16,000 lumens respectively, they provide 360 degrees of uninterrupted glare free illumination, giving off a continuous source of light.

Each contain a standard IP65 rated weatherproof electrical inlet and outlet socket which allows the user to connect multiple lights in a chain, but also to provide a connection for power tools and other electrical devices.

The BL Series bodies are constructed using an automotive type ABS, making the light highly durable with a solid and robust construction. The illuminating tube is made from a light diffusing polycarbonate which maintains a constant glow, fully lighting up your work area.

Up to 5 lights can be linked in series, providing light across a large area. The level of light is adjustable, with a half power function available if required allowing the user to save on power consumption.

The tripod is lightweight and strong, with non-scratch adjustable feet that allow use both indoor and outdoors in any weather situation.

	BL8000AC	BL16000AC
Gross Weight (kg)	5.2	6.4
Net Weight (kg)	4.4	5.4
Height (mm)	1,240	1,840
Width (mm)	180	
Input Voltage AC	100-240V AC 50/60Hz	
Light Type	LED	
Light Head	360 Degrees Direction	
Lumens	8,000	16,000
IP Rating	IP65 (When using an IP65 rated power cable)
