

Panoramic Station Kit

Permanent Display & Monitoring

Installation Guide

Package Contents

Please check that all components are included before installation.

1 Mounting pole

2 Bracket assembly

3 Stainless steel cable ties

4 Camera mounting plate

5 Camera holder

6 Screws and accessories

Installation Steps

Follow the steps below for proper installation.

1 Fasten the Camera Mounting Plate

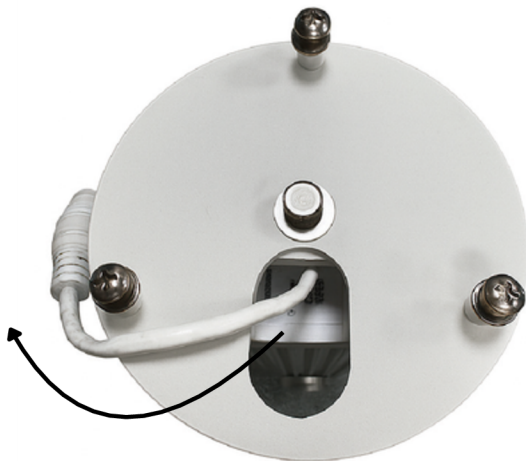

Use the center screw to secure the Camera Mounting Plate to the top of the mounting pole.

Tighten the center screw firmly so the plate and pole are fixed in position.

Note

Only the center screw is fastened in this step.

2 Confirm the Mounting Plate Position

Ensure the mounting plate is level and the bracket assembly is aligned vertically.

Make sure the camera cable passes through the opening in the plate before proceeding.

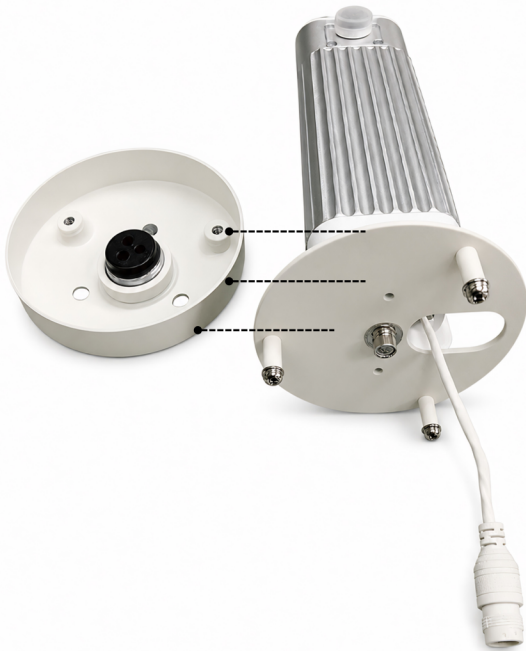

Caution

The camera cable must pass through the opening in the plate.

Installation Steps

Follow the steps below for proper installation.

3 Position the Camera Holder

Place the Camera Holder against the camera body and align it with the three screw posts.

Ensure the cable is routed through the opening before attaching the holder.

Note

The Camera Holder is the round mounting piece that fits onto the camera body.

4 Remove the Screws and Open the Rubber Ring

Loosen and remove the three original screws from the camera holder assembly.

Open the rubber ring on the Camera Holder to prepare for the next step.

Caution

Do not damage the cable, and keep the three screws for reassembly.

Installation Steps

Follow the steps below for proper installation.

5 Complete the Camera Holder Assembly

Attach the Camera Holder to the camera body.

Check that all screws are tightened and the cable remains accessible.

Note

Make sure the rubber ring is fitted correctly and tighten the three screws evenly.

6 Route and Connect the Cable

Route the cable through the mounting pole as shown.

Connect the cable between the camera unit and the bracket assembly.

Caution

Avoid sharp bends or excessive tension on the cable.

Installation Steps

Follow the steps below for proper installation.

7 Fasten camera and bracket

Attach the camera unit to the bracket and mounting pole.

Secure all screws and verify that the complete assembly is stable.

-  **Final Check**

 -  Bracket firmly secured
 -  Camera aligned correctly
 -  Cable connected properly

Camera Setup & User Guide

For camera configuration, software setup, and operation instructions, please refer to the separate camera user guide.
