AIDATAWORKS – B2B MODERNIZATION FRAMEWORK

Modernize.
Standardize.
Scale.

Organizations modernizing legacy B2B platforms, such as Informatica DX, MFT, DT, PowerCenter, IBM Sterling, Cleo, GoAnywhere, and MOVEit, rely on us for proven Informatica B2B modernization. Our framework modernizes these platforms into IDMC-based, cloud-native architectures, improving quality, accelerating delivery, and reducing risk.

WHY MODERNIZE

-  95% of new digital workloads are moving to the cloud
-  84% of data leaders say strong data foundations are critical
-  >75% of modernization projects fail due to lack of AI.
-  Lack of Innovation in On Prem Products
-  Growing Security Risks on legacy platforms

ADVANTAGES

- ✓ AI Enabled implementation - Operational & Functional
- ✓ Cross-industry delivery: Retail, Finance, Healthcare, Industrial
- ✓ Extensive experience with on-prem DX, MFT, PC, DT
- ✓ Versed across Informatica IDMC platform services
- ✓ Multiple Informatica migration projects delivered
