Who is in your family?
<b>Cooking Activity 20</b> <b>Annual Cheerio Bird Feeders!</b> Using pipe cleaners and cheerios, we will make bird feeders. 	<b>Science 21</b> <b>What makes a pinwheel spin?</b> 	<b>Let's Talk About it 22</b>  <b>What is the meaning of Earth Day</b>	<b>Classifying/Sorting 23</b> What can be recycled? Today we will sort items by what can and can't be recycled in our area.	<b>THEME DAY 24</b> <b>Pajama Day</b> 
<b>27</b> Let's collect leaves and other natural materials to make our own paint brushes! 	<b>28</b> <b>Reduce/Reuse/Recycle</b> How can we reduce our use of plastic and reuse or recycle what we use each day? 	<b>29</b> Check out this book. How are rainbows created? 	<b>30</b> <b>Carrots</b> Carrots are stuffed with carotenes which are phytochemicals* that convert to vitamin A. Just one medium carrot, that's about 1/2 cup, will give you a huge amount of your vitamin A! Vitamin A acts as an antioxidant (cleaning up repeating our cells) protecting our DNA from disturbances that can lead to cancer. It is essential to make our immune system function normally and is therefore vital in protecting our bodies from infection. And there was a reason we were told to eat carrots when we were children: as vitamin A is very important to the making of good sight - development and maintenance. www.checkyourfood.com
