

ENGINEERED SURFACE SOLUTIONS

E.S.S. BoreSweep™

Internal Hole Deburring Brushes (SiC)

ESS BoreSweep™ are silicon-carbide (SiC) bore brushes for inner-hole cleaning, deburring, rust removal, and fine polishing.

Uniform SiC filaments: strong cutting action with consistent pressure distribution and long life

Automation-ready: proven on CNC/automatic machines and robotic cells

Geometry-safe: non-metal abrasive filaments won't scratch or deform the bore; no folded metal
