

ENGINEERED SURFACE SOLUTIONS

E.S.S. Whisk™

CNC Lantern Deburring Tools

ESS Whisk™ deburring tools are engineered for CNC equipment, robotic cells, and precision finishing systems that require gentle yet effective edge refinement.

Adaptive filament “whisk” design follows part geometry

Maintains part accuracy; no aggressive edge roll-off

Ideal for cross-holes, slots, grooves, and intersections

Perfect for machined metals, medical devices, aerospace parts, and Automotive valves
