Changes To Original Plan: None

Withdrawn Products: None

SUMMARY OF TESTING METHODS AND KEY FINDINGS

Our Real-World Testing involved a combination of running reports and reviewing customer data. Using these methods allowed us to determine that all certified functionality is working as expected for those clients who have chosen to use it. The results of our testing will be broken down by measure, with an explanation of the testing methods and outcomes for each. No non-conformities were discovered during testing.

STANDARDS UPDATES (INCLUDING STANDARDS VERSION ADVANCEMENT PROCESS (SVAP) AND UNITED STATES CORE DATAFOR INTEROPERABILITY (USCDI))

No current standards have been updated under the Standards Version Advancement Process. Currently released version of EHR1 supports USCDI version1.0 and completed 2015 Edition Cures Update certification before October 2022. There are currently no plans to move to any later versions of USCDI during 2024.

No, none of my products include these voluntary standards.

Standard (and version)	None
Updated certification criteria and associated product	N/A
Health IT Module CHPL ID	N/A
Method used for standard update	N/A
Date of ONC ACB notification	N/A
Date of customer notification (SVAP only)	N/A
Conformance measure	N/A
USCDI updated certification criteria (and USCDI version)	N/A

CARE SETTING(S)

EHR1 is a EHR system designed for use in ambulatory settings. Therefore, all Real-World Testing was conducted using ambulatory client data.

METRICS AND OUTCOMES

Measurement/Metric	Associated Criterion(a)	Relied Upon Software	Outcomes	Challenges Encountered
Transitions of care and Direct Project	170.315(b)(1) Transitions of care and 170.315(h)(1) Direct Project	EMR Direct	5 Practitioners participated and reported: - receipt of C-CDAs into EHR when sent via Direct Messaging. - receipt of external C-CDAs into EHR via Direct messaging into the Inbound External Documents Queue.	N/A
Clinical Information Reconciliation and Incorporation	170.315(b)(2) CIRI	N/A	5 Practitioners participated and reported the parsing of discrete problems, medications, and medication allergies from an inbound C-CDA with reconciliation of that data into the EHR problem list, medication list and allergy list.	N/A
Data export	170.315(b)(6) Data export	N/A	5 Practitioners created a patient list used to generate a set of C-CDAs upon demand with their health information.	N/A
Ongoing Report Metrics	Associated Criterion	Relied Upon Software	Outcomes	Challenges Encountered
Transitions of care and Direct Project	170.315(b)(1) Transitions of care and 170.315(h)(1) Direct Project	EMR Direct	25 successful C-CDA transmissions recorded per month (5 per each Participating Practitioner) during the reporting period 0 failed transmissions were recorded during the reporting period 25 successful C-CDA transmissions received recorded per month (5 per each Participating Practitioner) during the reporting period	N/A
Clinical Information Reconciliation and Incorporation	170.315(b)(2) CIRI	N/A	25 successful problem list reconciliations recorded per month (5 per each Participating Practitioner) during the reporting period 25 successful medication list reconciliations recorded per month (5 per each Participating Practitioner) during the reporting period 25 successful medication allergy list reconciliations recorded per month (5 per each Participating Practitioner) during the reporting period 75 successful reconciliations of all three domains (problems, medications, medication allergies) recorded per month (5 per each category per Participating Practitioner) during the reporting period	N/A
Data export	170.315(b)(6) Data export	N/A	5 (1 per each Participating Practitioner) data exports performed each month during the reporting period	N/A

KEY MILESTONES

Key Milestone	Care Setting	Date/Timeframe
Data was collected and analyzed for each metric at the end of every quarter throughout 2023.	Participating Practitioners Practice Location via remote connectivity.	All data was reviewed and analyzed collectively in January 2024 in order to determine the outcomes for each measure.

ATTESTATION

This Real-World Testing is complete with all required elements, including measures that address all certification criteria and care settings. All information and these test results are up to date and fully addresses the health IT developer's Real World Testing requirements.
