How AudioEye Works

**audioeye**™

How our AI-powered accessibility platform and team of experts provide full-coverage support needed to ensure your website is compliant.

As smart as artificial intelligence has become, it simply cannot do everything that is needed to test and fix digital content so that it is accessible. And, in fact, the compliance standards explicitly recognize this and call for manual testing as a requirement.

The beauty of AudioEye is that our certified team of experts does all of the work. Simply install AudioEye onto your site and our team and technology take over. You're protected on day one, and we continuously monitor and fix accessibility issues on your site to ensure your ongoing compliance.

Advanced AI

400+ Automated Tests

Smart Fixes to Common Errors

Reporting & Analytics

Patented Accessibility Software

Expert Touch

Certified Accessibility Experts

Manual Site Evaluations

24/7 Helpdesk

STAR Plan for Legal Support

Accessibility is a Journey

TEST

Our comprehensive, AI-powered testing gives real-time insights into the errors your site visitors are encountering. Simply install the AudioEye JavaScript on your website and our platform gets to work right away.

REPORT

Our easy-to-understand reporting allows you to quickly see the improvements AudioEye has made on your site and the extent of remaining errors.

REMEDIATE

Our patented algorithms automatically fix the most common and unique accessibility errors. Our team of IAAP-certified experts is always ready to step in when needed.

MONITOR

Websites are dynamic and can change frequently. Our Live Monitoring system scans your site with every visit, identifying accessibility errors and performing real-time remediations that update your Accessibility Score.
